In your interest: Tire tests are a fixed component of KTM vehicle development.

With the knowledge that tire design has a powerful influence on handling, the KTM development department has been busy with intensive tire tests for years. Motorcycle tires are a fixed component of the overall vehicle concept. KTM tests possible tire mixtures for duration and performance under different conditions (rain, heat, race track, handling) for optimal compatibility with the vehicle. Only the tires that stand the extensive test procedure with regards to high speed stability, steering accuracy, handling, wet and dry grip and wear, receive a recommendation from the KTM vehicle engineers - and with it a "green light" for daily motorcycle life.

Motorcycle tires are a fixed component of the overall vehicle concept. KTM tests possible tire mixtures for duration and performance under different conditions (rain, heat, race track, handling) for optimal compatibility with the vehicle. Only the tires that stand the extensive test procedure with regards to high speed stability, steering accuracy, handling, wet and dry grip and wear, receive a recommendation from the KTM vehicle engineers - and with it a "green light" for daily motorcycle life.

In your interest: Tire tests are a fixed component of KTM vehicle development.

With the knowledge that tire design has a powerful influence on handling, the KTM development department has been busy with intensive tire tests for years. Motorcycle tires are a fixed component of the overall vehicle concept. KTM tests possible tire mixtures for duration and performance under different conditions (rain, heat, race track, handling) for optimal compatibility with the vehicle. Only the tires that stand the extensive test procedure with regards to high speed stability, steering accuracy, handling, wet and dry grip and wear, receive a recommendation from the KTM vehicle engineers - and with it a "green light" for daily motorcycle life.

Tires are only authorized **in pairs** (per row)
Indices are **minimum requirements**

speed index			
Index	km/h	Index	km/h
J	100	S	180
K	110	T	190
L	120	U	200
